Art Unit: 1632

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, drawn to a method for generating a porcine cell comprising at least one inactivated alpha-1,3 galactosyltransferase gene by using a DNA construct comprising a disrupted porcine alpha-1,3 galactosyltransferase gene, and a porcine cell comprising at least one disrupted alpha-1,3 galactosyltransferase gene, classified in class 435, subclass 93.21.
 - II. Claims 11 and 12, drawn to a method for eliminating or reducing hyperacute rejection of non-primate mammalian cells, tissues and organs by human serum by adding a galactose or a saccharide to said human serum, classified in class 435, subclasses 100, 101 and 105.

The inventions are distinct, each from the other because of the following reasons:

Groups I and II are distinct from each other because they are drawn to different scientific considerations: a method for generating a porcine cell comprising at least one inactivated alpha-1,3 galactosyltransferase gene vs. a method for eliminating or reducing hyperacute rejection of non-primate mammalian cells. They are materially different methods that differ in objectives, method steps, reagents used, dosages and schedules used, response variables, and criteria of success. They have different classifications and require separate searches. Thus, groups I and II are not obvious variants and are patentably distinct.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1632

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
